The strong, silent type, the Panther XT is the high torque synchronous belt that purrs. A powerful alternative to chain or a drop-in replacement for polyurethane belts,* Panther XT belts are engineered to run quietly and efficiently in the harshest environments.

Naturally agile, Panther XT belts move quickly and easily, to help achieve power ratings that meet or exceed the competition.

Panther XT high torque synchronous belts easily outlive most competition...by nine lives! In life tests against competitive belts, Panther XT belts outlived most competitors, some by more than nine times, or >95%.

Panther XT belts...PURRRFECT TIMING.

www.carlislebelts.com/PantherXT
**STRONG like a panther**
- Carbon fiber cord construction with high tensile strength and minimal stretch increases durability
- Fabric is engineered to be low-friction and abrasion resistant for extended belt life
- Oil and heat resistant (up to 120°C/248°F) advanced polymer compound combines high elasticity and hardness for improved performance in harsh environments

**EFFICIENT like a panther**
- Achieve 98% efficiency. Visit www.powermiser.driveengineer.com to calculate the savings on your next drive

**PURRS like a panther**
- Advanced polymer construction and special fabric design reduce noise when compared to chain or polyurethane belts

**RUNS like a panther**
- Panther XT belts are engineered to achieve higher power ratings
- Designed for efficiency, Panther XT belts minimize drive widths resulting in more compact drive designs and reduced metal costs

**BUILT like a panther**
A: High-modulus carbon fiber cord  
B: High performance advanced polymer composite for high torque transmission, flexibility, and extended belt life  
C: High strength, low-friction fabric facing engineered for maximum wear resistance

**Timken Belts** recommends Martin® MPC® Sprockets – MFB or Taper Bushed (8mm, 14mm). Panther XT belts are also compatible with Gates® Poly Chain® GT®2 sprockets. The Panther XT synchronous belt is a super high torque product that is not for use in standard high torque sprockets such as HTD®, HTS®, or RPP®. Caution: Use of sprockets other than MPC® sprockets or Poly Chain® GT®2 sprockets with Panther XT belts could result in mechanical failure of bushings, sprockets, bearings or shafts, possibly resulting in physical injury. Martin®, HTS®, and MPC® are registered trademarks of Martin Sprocket & Gear, Inc. Gates®, Poly Chain®, GT®, and HTD® are registered trademarks of Gates Corporation. RPP® is a registered trademark of Timken Belts.

**Part Number Example:**

8MXT-640-36  = 8 640-4480  =  12, 21, 36, 62  
14MXT-3850-20 = 14 994-4410  =  20, 37, 68, 90, 125

---

**Stronger. By Design.**
